Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

Read more about Early Journal Content at http://about.jstor.org/participate-jstor/individuals/early-journal-content.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

registered during the week, including measles, 126; scarlet fever, 25; diphtheria, 62; whooping cough, 33; enteric fever, 11; and diarrhea and dysentery, 20. The deaths from all causes corresponded to an annual rate of 18.1 a thousand. In greater London 1,956 deaths were registered, corresponding to an annual rate of 16.9 a thousand of the population. In the "outer ring" the deaths included 16 from diphtheria and 15 from measles.

Ireland.—The average annual death rate represented by the deaths registered during the week ended December 21 in the 16 principal town districts of Ireland was 23.1 a thousand of the population. The lowest rate was recorded in Kilkenny, viz, 4.7, and the highest in Wexford, viz, 36.1 a thousand. In Dublin and suburbs 168 deaths were registered, including scarlet fever, 1; enteric fever, 3; diphtheria, 1; and whooping cough, 1.

Scotland.—The deaths registered in 8 principal towns during the week ended December 21 corresponded to an annual rate of 19.2 a thousand of the population, which is estimated at 1,500,435. The lowest mortality was recorded in Perth, viz, 13.7, and the highest in Greenock, viz, 33.5 a thousand. The aggregate number of deaths registered from all causes was 553, including measles, 17; scarlet fever, 13; diphtheria, 11; and whooping cough, 23.

INDIA—*Singapore.*—Month of October, 1895. Estimated population, 56,000. Total deaths, 654, including cholera, 9; and beriberi, 48.
